UI/UX designer with a high level of motivation, great aesthetic sense, user-centric approach, leadership abilities, and the capacity to work well in a team. My expertise in these fields will be essential in developing aesthetically pleasing and user-friendly interfaces for a variety of projects. I am deeply familiar with user interface and user experience design principles.

EXPERIENCE

UI/UX Designer

WebBriks | February, 2025- Present

- Execute full design cycles from user research
- Design modern, scalable, and developer-friendly user interfaces.
- Create and maintain design systems to ensure consistency.
- Prepare dev-ready assets and ensure pixel-perfect implementation.
- Collaborate closely with frontend developers during handoff and QA.
- Ensure accessibility standards, clarity, and strong visual hierarchy.

UI/UX Designer

TechSolutions | April, 2021 – May, 2022

- User interface and user experience design in alignment with project requirements.
- Crafting dynamic and user-centric UI designs to meet project specifications.
- Leveraged design technologies such as Figma.
- Collaborated with cross-functional teams for design ideation and feedback.

PROJECTS

RideShare App

The user interface of our Ride Share app is simple and straightforward. Smooth animations and clear icons make it easy to use the app. In just a few clicks, you can request a trip, browse nearby drivers on a map, and follow their arrival in real time. Enjoy a flawless experience from beginning to end!

Tools Used: Figma, Adobe PhotoShop
